### **Scope of project management**

Techno Sales International Ltd UK specialises in the sourcing, supply of most capital equipment for industrial projects. For over two decades, we have been concentrating in the Africa and the Middle East markets for over two decades. As a result we have amassed extensive knowledge, when it comes to servicing requirement of clients in these markets.

Our ability to offer complete solutions from concept to completion reassures our Clients in keeping to the project's timeline and allows them the peace of mind that comes for the smooth execution of the projects.

#### **Project Launch**

We work closely with our clients. By doing so and by sharing our knowledge and expertise to our clients to work out their project viability for any industrial projects. We help avoid unnecessary delays and maintain spending within budget.

#### **Co-ordination**

Collaboration between various MEP, architectural and structural teams is essential for the success of the project. When we are engaged to manage a project, we arrange and enforce collaboration; thus ensuring works are carried out as planned without duplication or conflict.

#### **Site Management**

When necessary, we deploy our own site managers. Their expertise helps steer projects back on track. They are also capable of providing alternative solutions to unforeseen site issues.

#### **Total Supply**

From Capital equipment to ancillaries, accessories and consumables, we offer our clients the benefit of sourcing most of the necessary materials from one place, under one warranty policy with compatibility reassurance and reliable technical support,

#### **Commissioning and Start up**

Equipment commissioning is a vital stage in project handover. Our technical expertise ensures the smooth operation of installed systems thus avoiding unnecessary delay and expense.

#### **Spare Parts and after sales service**

We ensure uninterrupted supply of spare parts and components for all capital equipment we supply. Also, we provide expert technical advice for clients' operational staff.

#### **Fabrication**

We have tremendous resources for fabrication using most modern technology. Our partners and associates have most modern equipment and workshop facilities to provide customized solution to clients' drawing and specification.
